

# Horn A Plenty Wildlife Mixture

**Horn A Plenty Wildlife Mixture:** A great mixture for wildlife. This mixture combines carefully selected seeds to provide an abundant and diverse habitat for wildlife. With 20% Crimson Clover and 20% Arrowleaf Clover, this blend ensures a rich and reliable source of high-quality forage, packed with essential nutrients. The inclusion of Italian Annual Ryegrass contributes to the lushness and durability of the vegetation, providing a dense cover and a thriving ecosystem for wildlife. Green Globe Turnips and Giant Rapeseed add variety to the mix, offering a food source that attracts a wide range of wildlife, from deer to game birds. Horn A Plenty not only satisfies the hunger of wildlife but also supports soil health and fertility, making it an excellent choice for customers seeking to create an enticing and sustainable wildlife habitat.
